ABOUT ME

After ending 16 years in the previous job and being very passionate about everything involving programming and THE WEB, I started the journey of becoming a professional web engineer. Since then, I'm definitely in love with it ALL :)

I am a very organized person, committed to work, a team player with great self learning abilities.

I love all kinds of sports, especially skating and hiking our beautiful mountains. Very fond of reading tech books but fiction as well. Can not resist any escape in nature.
